GROUND FIXED TILT™ TOP CHORD

ONE TOP CHORD FITS ALL MODULE SIZES

UNIRAC
BETTER SOLAR STARTS HERE

ADVANCED COMPATIBILITY

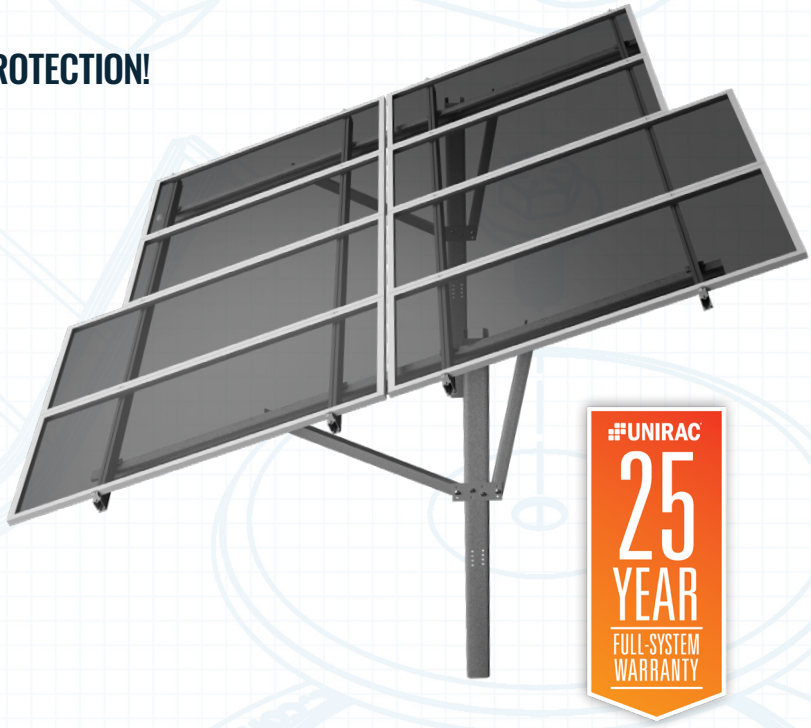
- GFT Top Chord is now compatible with all new large format modules
- Adaptable to all module sizes, GFT Top Chord offers the most efficiency & solar-output for your array

UNIRAC QUALITY MEETS EXPANSIVE UTILITY

- Extra length utility - Keep your reliable Unirac Module Clamps, just switch the top chord
- Larger modules enable improved dollar per watt; Get more bang for your solar buck!
- Will not negatively impact your project schedules or deadlines – Easy and seamless conversion & rolling implementation

EXTRA LENGTH; SAME STANDARDS; INCLUSIVE PROTECTION!

- Added hole packs translates to added 'Grippage' and extra stability options for your array
- Increase your module length, not load vulnerability. With GTF Top Chord your load arrays (both large and small) still fall within acceptable load requirements (moisture, wind, and seismic)



HIGH QUALITY SAME LOW PRICE

- Added capability and enhanced features for the same competitive budget

WHY GFT TOP CHORD?

Unirac's release of our updated GFT Top Chord introduces an extended-length design for the newer, large-format modules. Additionally, using the same profile and hole-pack mounting system keeps the installation process familiar on any module size. This upgrade seamlessly integrates with existing FT components, requiring no changes or replacements for other parts of the system--this makes GFT Top Chord compatible with both large- and small-format module sizes. Newly released in April, this revamped product maintains the same list price as its predecessor, guaranteeing a smooth transition for customers while providing enhanced functionality and adaptability. Order-able today!
