Re.: Innova Technologies No.: 121-099-400
Unirac Ground Fixed Tilt (GFT) Design Tool – Michigan

Attn: Engineering Services

Innova Technologies Inc. has reviewed Unirac's GFT design tool and design methodology. The design tool's methodology is approved and is acceptable for the code-compliant, ground mount racking structure supporting photovoltaic (PV) modules for residential and commercial uses.

All analysis and information in the GFT design tool's formulas and tables comply with the following:

- 2009 International Building Code, 2012 International Building Code, 2015 International building code & 2018 International Building Code, by International Code Council Inc.
- ASCE/SEI 7-05, ASCE/SEI 7-10, and ASCE/SEI 7-16 Minimum Design Loads and Other Structures, by American Society of Civil Engineers.
- Michigan Building Code 2009, 2012 & 2015 Editions.
- 2005 Aluminum Design Manual, 2010 Aluminum Design Manual, 2015 Aluminum Design Manual (ADM), & 2017 Aluminum Design Manual, by the Aluminum Association

This letter certifies that the structural analysis of the racking members, connections, and foundation designs are in compliance with the above codes.

For more information, see the GFT construction drawings. This analysis does not include specific corrosion requirements.

Best Regards,

Robert Naples
