Re.: Innova Technologies No.: 124-099-400
Unirac Ground Fixed Tilt (GFT) Design Tool – Oregon

Attn: Engineering Services

Innova Technologies Inc. has reviewed Unirac's GFT design tool and design methodology. The design tool's methodology is approved and acceptable for the code compliant, ground mount racking structure supporting photovoltaic (PV) modules for residential and commercial uses.

All analysis and information in the GFT design tool's formulas and tables comply with the following:

- 2009 through 2024 International Building Code, by International Code Council Inc. with provisions from SEAOC PV-2
- ASCE/SEI 7-05 through 7-22 Minimum Design Loads and Other Structures, by American Society of Civil Engineers.
- 2014 through 2022 Oregon Structural Specialty Code.
- 2005 through 2020 Aluminum Design Manual, by the Aluminum Association.

This letter certifies that the structural analysis of the racking members, connections and foundation designs are in compliance with the above codes, and all local amendments.

For more information, see the GFT construction drawings. This analysis does not include specific corrosion requirements.

Best Regards,

Carlos Banchik
