MORE PRODUCT INFO

The entire METAL X[®] Racking System consists of small components that are easy to ship, transport, load onto the roof, and install. No rails are needed.

Components fit every module thickness, so any module can be installed on every metal roof. Installer-focused design delivers fast, simple installation at the lowest cost per watt for industrial, commercial and residential metal rooftops.

Unirac has taken the tried-and-true form and functionality of RM10 and evolved it to maximize the potential of flat roof solar projects. We have paired simplicity with power by improving the function, strength, and reliability of the module clamps and modifying the shape of the North Row Bay to optimize space and increase module density.

GRIDFLEX[®] 5D combines strength and flexibility for the best in flat roof solar, offering low ballast counts and ultimate array design flexibility. Rail sections connect to create a rigid structure that greatly reduces ballast weight. Modular, pre-assembled components offer ultimate array design flexibility and an installer-preferred construction process. Additionally, pre-assembled stanchion clamps secure the inside and outside of the module frame for robust, reliable connections.

GRIDFLEX[®] 10D is Unirac's advanced 10-degree flat roof racking solution, engineered for strength, efficiency, and long-term performance. It minimizes ballast and attachments to reduce overall system costs while maximizing structural stability and roof utilization. User-friendly clamps, labeled connections, and precision guides ensure quick, accurate installation, while the swing-up access design simplifies maintenance and single-module servicing. With integrated wire management and flexible row spacing, GridFlex[®] 10D delivers a clean, secure, and cost-effective approach to flat roof solar installations.

RM5 is a ballasted south-facing five-degree tilt mounting system for flat roofs. Fewer components, single tool installation, snap-in hardware, and integrated bonding ensure high speed installation, while features such as 7.5" or 11" row spacing and optional wind deflector, roof attachments, MLPE mount, and wire management provide a complete solution.

Maximize energy density and minimize cost with RMDT™, UNIRAC's ballasted dual tilt flat roof mounting system.

Fewer components, single tool installation, snap-in hardware, and integrated bonding ensure high speed installation, while optional roof attachment, MLPE mount, and wire management provide a complete solution.

Unirac's GROUND FIXED TILT™ (GFT) system is a pre-engineered, single-post solution designed to simplify ground mount projects of any scale. With 20° and 30° tilt options and compatibility with all large-format modules, GFT uses standardized, lightweight components that are in stock and ready to ship from North America's largest distribution network. Backed by industry-leading project support and a 25-year warranty, GFT delivers speed, strength, and system flexibility, from permitting to installation.

UNIRAC LARGE ARRAY™ supports a wider range of site and climatic challenges than any other PV structure on the market. Unirac Large Array aluminum components merge with SOLARMOUNT® and GFT rails and installer-supplied steel pipe to form durable, rigid truss structures that can accommodate uneven, rocky, or sloping terrain. Modular design and project flexibility are limited only by the size of the ground site.

NXT ADJUSTABLE TILT LEGS

Unirac ADJUSTABLE TILT LEGS provide a fully adjustable 10°–30° tilt using just two legs, with complete kits that include front foot, rear leg, and all hardware. Install options include flashless butyl for a fast, watertight seal, or universal L-foot compatibility for use with third-party attachments. Designed for shingle, low-slope, flat, and metal roofs, Adjustable Tilt Legs require no ballast, are UL 2703 certified for nationwide compliance, and are available in U-Builder for streamlined planning. Offered in two sizes—12" (8–12") and 30" (18–30")—they deliver versatility, speed, and code-compliant performance on any roof.
