

UNIRAC & S-5!

PRE-ASSEMBLED METAL ROOF ATTACHMENTS

SIMPLIFYING METAL ROOF SOLAR INSTALLATIONS

Designed for the Unirac NXT UMOUNT® System, these integrated attachment kits simplify metal roof installations by reducing rooftop assembly and eliminating the need to source brackets and rail mounts separately. The result is a faster, more streamlined install experience built for efficiency on the jobsite.

ALL-IN-ONE PRE-KITTED SOLUTION

- Eliminates the need to source and assemble separate components
- Pre-assembled kits simplify inventory and improve jobsite efficiency
- The rail clamp attaches directly to the metal roof bracket, eliminating the L-Foot and reducing the total number of parts

FASTER INSTALLATION

- Pre-assembled attachment kits are designed for speed and simplicity
- Fewer assembly steps on the rooftop allows for faster installation timelines

EXPANDED COMPATIBILITY

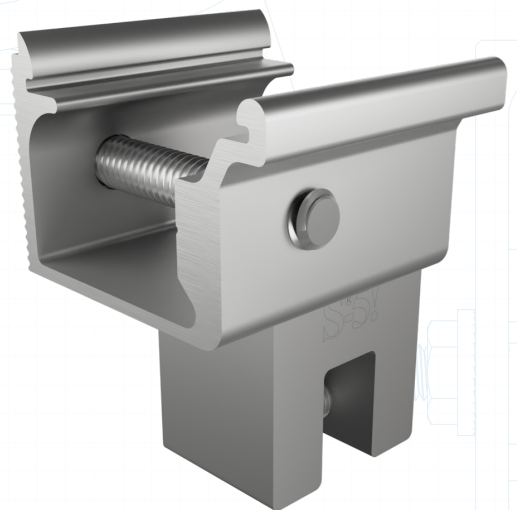

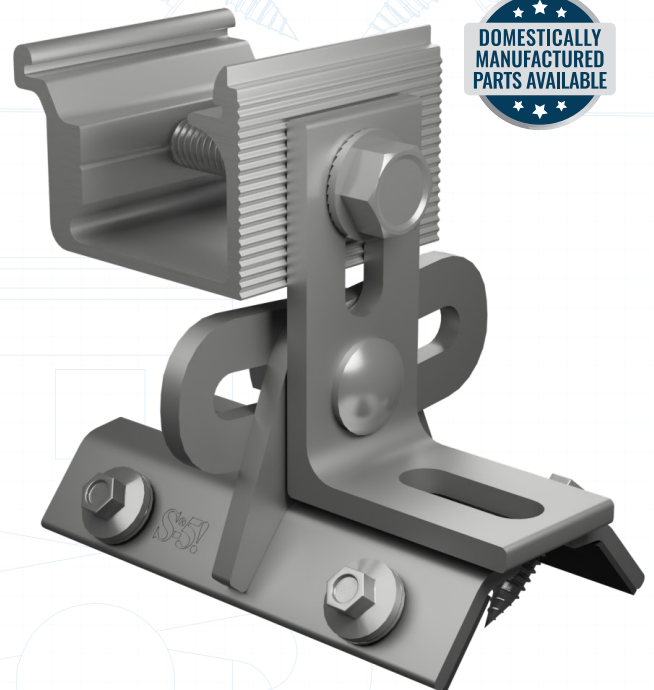

- Engineered to support a wide range of standing seam and trapezoidal metal roof profiles
- Five (5) Unirac pre-assembled kits available increases installation flexibility and reduces the need for custom solutions

TRUSTED PERFORMANCE. SEAMLESS INTEGRATION

- Combines the proven performance of the Unirac NXT UMOUNT System with industry-leading S-5! metal roof attachments for a reliable, integrated installation experience on metal roofs

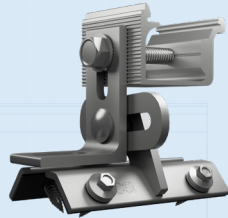

BUILT FOR CONFIDENCE

- Fully compatible with the Unirac NXT UMOUNT System
- Suitable for residential and commercial applications
- Meets the UL 2703 Standard
- Domestically manufactured parts available

METAL ROOF ATTACHMENT SOLUTIONS

PROTEABRACKET + UNIRAC STRONGHOLD RAIL CLAMP (NUS5PROBKT-US)

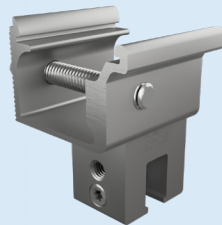

- Compatible with trapezoidal metal roof profiles.
- Designed to attach directly to the roof sheeting using stainless-capped screws
- No messy sealants required with factory-applied EPDM pad for a weatherproof fit

S-5-S MINI + NXT METAL ROOF RAIL CLAMP (NUS5S-MI-US)

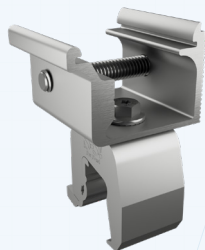

- Compatible with vertical snap-together standing seam profiles and the traditional single-fold (angle-seam) horizontal profiles or similar seam types
- Designed as a non-penetrating attachment solution on standing seam roofs

S-5-U MINI + NXT METAL ROOF RAIL CLAMP (NUS5U-MI-US)

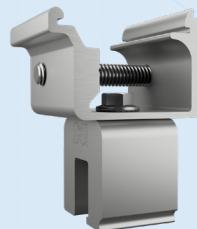

- Compatible with vertical seam orientations or clamp can rotate 90° for use on many horizontal 2" seam profiles
- Designed to fit approximately 85% of standing seam profiles manufactured in North America, including structural and architectural profiles

S-5-N MINI + NXT METAL ROOF RAIL CLAMP (NUS5N-MI-US)

- Compatible for for 1" (25 mm) Nail-Flange metal roof profiles
- Designed as a non-penetrating, standing seam metal roof attachment

S-5-V MINI + NXT METAL ROOF RAIL CLAMP (NUS5V-MI-US)

- Compatible with most machine-folded standing seam profiles in vertical orientation or specific compatible seam dimensions
- Designed as a non-penetrating, standing seam metal roof attachment
