

QUICK START GUIDE

U-BUILDER™ GO - IDEAL FOR ALL YOUR RAPID QUOTING NEEDS

CLICK ON THIS LINK TO ACCESS **U-BUILDER GO**
AND LOG IN USING YOUR CREDENTIALS

1. Start a new project by clicking the **+NEW PROJECT** button.
Select from any of the 5 System Types

STEP 1 OF 4
Select a system type

Start from a profile (optional)
-- Select a profile --

NXT Rail System PITCHED
SM Rail System PITCHED
RML0EVO Bay System FLAT
GF100 Grid System FLAT
GF50 Grid System FLAT

Select one to continue

Continue

2. Enter the Project details:
Project Name, Client Name, Installation Address

STEP 2 OF 4
Project details

Project Name
RML0EVO e.g. Rosewood Residential Phase 1

Client Name
e.g. Jordan Hartley

Installation Address
Start typing an address or ZIP...

Building code and load data will be fetched from your address.

Back Continue

3. Select the **Module Manufacturer and Model**

STEP 3 OF 4
Select module

Manufacturer Model
Type or select... Select a manufacturer first

UNITS Imperial

OUTPUT
WIDTH
LENGTH
THICKNESS

4. Select the roof type and click **PARTS LIST**
Note: Roof types will vary depending on pitched vs. flat roof systems

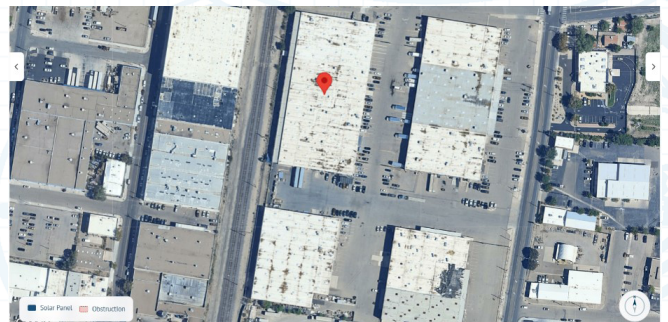

STEP 4 OF 4
Select roof type

Select the membrane type for this flat roof installation.

EPDM TPO PVC KEE TPA
APP SBS ACRYLIC COATED OTHER

Back Start Design

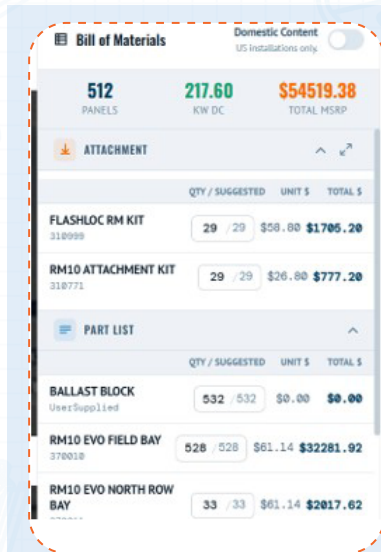

YOU ARE READY TO DESIGN YOUR PROJECT!!

Flat roof projects open in map view with a location pin placed at your address. Pitched roof projects open in a blank workspace where you can begin designing.
