SOLARMOUNT is the professionals' choice for residential PV mounting applications. The system is designed for superior aesthetics and an easier, faster installation experience, including fewer SKUs, preassembled components, and integrated bonding. SOLARMOUNT is a complete solution with revolutionary universal clamps, FLASHKIT PRO, full system UL 2703 certification and 25-year warranty. Not only is SOLARMOUNT easy to install, but best-in-class aesthetics make it the most attractive on any block!

Take your business to the next level with SFM INFINITY, UNIRAC’s rail-less PV mounting system for flush mount installations on pitched roofs. SFM INFINITY optimizes your operations on and off the roof, with approximately 40% less labor, 30% logistics savings, and 20% fewer roof attachments than traditional solar racking. Plus, 87% of homeowners prefer SFM INFINITY’s aesthetics.

The entire MetalX Racking System consists of small components that are easy to ship, transport, load onto the roof and install. No rails are needed. Components fit every module thickness, so any module can be installed on every metal roof. Installer-focused design delivers fast, simple installation at the lowest cost per watt for industrial, commercial and residential metal rooftops.

The entire MetalX Racking System consists of small components that are easy to ship, transport, load onto the roof and install. No rails are needed. Components fit every module thickness, so any module can be installed on every metal roof. Installer-focused design delivers fast, simple installation at the lowest cost per watt for industrial, commercial and residential metal rooftops.

The RM5 system provides unsurpassed adaptability and layout flexibility with 5 degree tilt. Row spacing options of 7.5 IN. or 11 IN. give you the ability to maximize array layout and increase project energy production. Wind deflectors provide ballast reduction and fire mitigation to reduce overall system weight on the roof to meet a variety of project requirements.

Unirac has taken the tried-and-true form and functionality of RM10 and evolved it to maximize the potential of flat roof solar projects. We have paired simplicity with power by improving the function, strength and reliability of the module clamps and modified the shape of the north row bay to optimize space and increase module density by up to 20%. The system continues to consist of only three major components, minimizing installation time and reducing soft costs. Quickly design around roof obstacles and bond the system with just the turn of a wrench. As with our legacy

RM10 introduced the Power of Simplicity to the ballasted flat roof solar industry. The system consists of only two major components, minimizing preparation work and installation time with one tool assembly. Seamlessly design around roof obstacles, support most framed modules and bond the system with just the turn of a wrench.

EcoFoot5D delivers preassembled parts and an out-of-the-box, ready-to-go installation. Small 7x16.7” roof-friendly modular Base and dense 9.9” inter-row spacing enables a tightly packed solar array that delivers 18.4% more power than 10° systems. Whether your roof is small or large, EcoFoot5D provides more power, lowering cost-per-watt.

The EcoFoot2+ solar panel mounting system provides a structurally rigid and electrically connected array while simplifying the installation process. The base is the hub of the ballasted mounting system. The optimized shape is lightweight, roof friendly, and can be quickly positioned on the roof. EcoFoot2+’s pre-assembled components and simple installation process ensure your project timelines and labor targets are met.

**FLASHLOC™ RM**

**NEW** THE STRONGEST ATTACHMENT FOR EVERY FLAT ROOF

FLASHLOC™ RM is a lightweight, durable, powder-coated cast aluminum roof attachment solution that provides fast, easy installation and helps save labor costs. FLASHLOC™ RM is compatible with most roofing materials and is applicable for almost all solar racking form factors. Rigorous mechanical, sealing, and ease-of-install testing has been successfully completed for assurance of long-term reliability.

GridFlex™ combines strength and flexibility for the best in flat roof solar. Low ballast counts and ultimate array design flexibility. Rail sections connect to create a rigid structure that greatly reduces ballast weight. Modular, preassembled components offer ultimate array design flexibility and installer preferred construction process. Additionally, preassembled stanchion clamps secure the inside and outside of the module frame for robust reliable connections that can be trusted beyond the 25-year warranty.

Ground Fixed Tilt (GFT) is an engineered system of standard, light weight ground mount components that is in stock and ready to ship from North America's largest ground mount distribution network. Unirac’s unmatched commercial project support makes construction easy, from permitting through installation, including region-specific engineering. GFT’s refined solution, including a new shared Rail design, delivers enhanced system and labor optimization. Plus, enjoy peace of mind with SOLARMount Mounting Technology and Unirac’s industry-leading 25-year warranty.

**COMPATIBLE WITH CONVENTIONAL AND SHARED RAIL DESIGNS**
UNIRAC LARGE ARRAY (ULA) supports a wider range of site and climatic challenges than any other PV structure on the market. ULA aluminum components merge with SOLARMOUNT rails and installer-supplied steel pipe to form durable, rigid truss structures. ULA has the flexibility for any size project.

**SOLOBOX JUNCTION BOX**

(NEW) THE ONLY ROOF JUNCTION BOX YOU NEED

SOLOBOX is the only junction box you need for comp shingle, roll comp, and rail-mounted applications. Featuring Flashloc Technology, SOLOBOX saves you time and labor on the roof by limiting shingle cutting and prying nails on attic runs. SOLOBOX is NEMA 3R rated, UL1741 certified and backed by Unirac’s 25 year warranty.
