

UNIRAC[®] | CERTIFIED INSTALLER PROGRAM

BETTER SOLAR STARTS HERE

To uphold the highest standards of quality and workmanship, we collaborate with solar installers who share our commitment to excellence. Our mission is to raise the standard through comprehensive training and bolster consumer trust and confidence via certification. While we already boast the industry's leading racking warranty, we aim to surpass expectations by offering select partners an extended homeowner warranty that transcends our standard 25-year coverage. Our network of Unirac Certified Installers undergoes rigorous training, quality assessments, and process evaluations before earning their place in our prestigious program.

TAILORED TRAINING

Certified Installers receive sales and product trainings, along with access to Unirac's Installer Sales Specialist team, where they will learn installation best practices.

SUPERIOR WARRANTY

By utilizing homeowner registration, we ensure that all warranties are fully transferable to the homeowner. Unirac has been in business for over 20 years and will be here to stand behind our warranties.

SPECIALIZED MARKETING

Use your certification status to separate yourself from the competition. Unirac will assist in your marketing efforts to help you grow in your market, win jobs, and boost homeowner confidence.
