

COMMERCIAL SERVICES

UNIRAC PROVIDES DEDICATED SUPPORT FOR ALL OF YOUR COMMERCIAL SOLAR PROJECTS.

Unirac's unmatched commercial project support seamlessly integrates into your project lifecycle. Save design time on any size commercial project with customized system designs and engineering coupled with the expertise of the Commercial Support Team.

BRANDON CARRASCO
VP OF COMMERCIAL AND INDUSTRIAL

THE RIGHT TEAM DEDICATED ENGINEERS, DESIGNERS, AND SUPPORT SPECIALISTS

Your project doesn't have time to wait, which is why UNIRAC has one of the largest engineering and design teams dedicated to commercial projects. Team scalability means that spikes in your project pipeline are not an issue. With hundreds of years of combined solar experience, the UNIRAC Engineering Services team will partner with you through design, engineering, permitting, and installation.

PERSONAL SUPPORT DELIVERED 3-5 BUSINESS DAY TURNAROUND TIME

Projects are typically designed, engineered, and returned in 5 business days or less. When revisions or support are required, you have direct access to engineers and designers. UNIRAC's commercial projects team of over 20 Commercial Project Managers, Account Managers, and Application Engineers work to get solutions back to you quickly. Flat roof, pitched roof, and ground mount projects are all supported. Take advantage of the flexibility of comparing multiple fully designed options for your project.

STAMPED DESIGNS IN MINUTES U-BUILDER ONLINE DESIGN TOOL

Create layouts, engineering reports, access stamped professional engineering letters in minutes, and manage all of your projects in one place using UNIRAC's U-builder online design tool. Design on a map interface, import Helioscope designs, and get ASCE code-specific design criteria by zip code. Need further design work? Our team can access your U-builder project and start there.

REQUEST SUPPORT WITH EASE ONLINE OR EMAIL

Use our online form with simple input and the ability to upload files to ensure that the right information is gathered the first time, avoiding time-wasting iterations. Requests are fast-tracked to the design and engineering teams for rapid response. Requests can also be submitted via email directly to our team.
