

## ARE YOU AN INSTALLER LOOKING TO LEVEL UP?

Elevate your hands-on skills in solar racking installation with Unirac's MIP™ (Master Installer Program). This program is designed to sharpen your practical skills in installation design and troubleshooting. Whether you are a seasoned installer or new to solar, we can help take you to the next level!

### KEY BENEFITS

- **Safety First:** Learn Unirac's safety protocols for different types of installations to work smarter and safer.
- **Quality Workmanship:** Uncover best practices for top-quality installations that reduce costly do-overs.
- **Efficiency Boost:** Upgrade your team's planning and execution skills with our targeted training.
- **Flexible Learning:** Use our easy-to-navigate mobile app with interactive lessons designed to learn anytime, anywhere – whether you're on-site or at home.
- **NABCEP® CE:** Keep your skills and certifications current with our NABCEP® accredited courses.
- **Bragging Rights:** Completing each tier earns you certificates and rewards, setting you apart in the solar field.

### A PROGRAM BUILT FOR ALL

- Tailored for installers currently using Unirac products
- Training for every skill level

#### CRAFTSMAN

INSTALLATION 101 **4-6 HRS**

Gain confidence in your installation skills.

Whether you're starting out or need a refresher, we cover the basics of residential installations on pitched roofs, attachments and accessories.

#### PROFESSIONAL

ADVANCED TRAINING **4-5 HRS**

Level up your skills to conquer any install.

Sharpen your skills with manufacturer approved pro tips and time saving techniques for both commercial and residential installations.

#### MASTER

PROVE YOUR SKILLS **VIRTUAL TEST**

Become a true expert in your craft.

Reserved for crew leads and trainers. Prove your skills through a virtual test and written exam with an installer sale specialist.
