RE: Installing Yingli PV Modules with Unirac RM5 & RMDT ROOFMOUNT System

To Whom It May Concern,

Yingli Green Energy Americas, Inc. (Yingli) has internally evaluated the mounting method for attaching its YGE and YLM 60&72 Cell Series PV modules using the UL 2703 certified Unirac RM5 & RMDT ROOFMOUNT System.

Yingli deems the above mounting method to be structurally sound for the mounting orientations, span and design loads allowed by Unirac RM5 and RMDT installation manual which is governed by CSA Listing Report # 70072584. Provided that the PV modules are installed in accordance with the NEC and applicable local codes in addition to Unirac Installation Guide, and the mounting method is reviewed and approved by a certified engineer, use of this method shall maintain the Limited Warranty for PV Modules.

Final acceptance of this mounting method and verification that the installation of the mounting system and underlying support structure is in accordance with the specified instructions of their respective manufacturers is at the ultimate discretion of the local inspector and/or authority having jurisdiction.
